# Bear

It's springtime and two black bear \_\_\_\_\_ are ready to play! They spent the long winter in a \_\_\_\_\_ with their mother, drinking her \_\_\_\_\_ while she slept. Now the mother will teach them to \_\_\_\_\_ for food.

\_\_\_\_\_ like to play. This helps them to learn about hunting.

Strong \_\_\_\_\_ are good for catching fish.

A mother polar bear lives with her cubs in a \_\_\_\_\_. She digs her den in a snowbank on the side of a hill.

Black bear cubs have long, sharp \_\_\_\_\_, just like their mother. They use their claws to climb trees and to hunt.

Thick \_\_\_\_\_ keeps the bears warm during the cold winter.
