

To help you complete this worksheet, use the Nature's Patterns book.

Day and night

There are many _____ in nature that we can see every day. We can see the pattern of day and night. During the _____ the sun moves through the sky. When the sun sets, the day ends and _____ begins.

At _____
the sun rises
into the sky.

At _____, the
sun is at its highest
point in the sky.

People cast _____ in
sunlight. The
shadows move just
like the people.

At _____, the sun
seems to disappear beneath
the ground. Daylight has
ended.
