# The sun

From \_\_\_\_\_ the sun looks like a giant ball of fire. The sun gives us light, \_\_\_\_\_, and energy. Almost all living things on Earth – plants, animals, and people – need energy from the sun to \_\_\_\_\_. The sun is a thing called a \_\_\_\_\_. There are many, many more stars like our \_\_\_\_\_ in outer space.

Large loops of gas can shoot out of the sun during a bright \_\_\_\_\_.

The sun is about \_\_\_\_\_ million kilometres away from Earth.

The outside of the sun has a temperature of about \_\_\_\_\_ degrees Celsius.

Plants use \_\_\_\_\_ from the sun to make their own food.

\_\_\_\_\_ are dark, circular areas on the outside of the sun.
