

To help you complete this worksheet, use the *Rain Forest Animals!* book.

## Insects and Spiders

There are more insects in the rain forest than any other animal. An insect has \_\_\_\_\_ legs and \_\_\_\_\_ main parts to its body, which has a tough covering. A spider has \_\_\_\_\_ legs. It has fangs and can spin silk. Spiders feed mostly on \_\_\_\_\_.

A \_\_\_\_\_- \_\_\_\_\_ ant carries part of a leaf back to its nest to make food.

A butterfly's tongue sucks up \_\_\_\_\_ juice like a straw.

Most butterflies have wings with beautiful \_\_\_\_\_.

A butterfly lands on a leaf to drink the juice from a \_\_\_\_\_.

A hard case protects the ant's body like a coat of \_\_\_\_\_.

An ant smells, tastes and touches using its \_\_\_\_\_.
